

White Water House

VAM SOFT-PURE[®]

100% Water Solutions

Pure Water For
Healthy Life

India's 1st Copper Alkaline RO System

COMPANY PROFILE

We are a leading ISO 9001:2015 company providing cost effective & compact water & wastewater treatment solutions. Backed by team of technocrats who have been serving water industry for decades and are capable of handling difficult problems with their wide experience.

The company has a long reference list of successfully working water & waste water treatment plants. With expertise in a wide spectrum of technologies in drinking water, process water, sewage and industrial effluent treatment, we provide very economical and effective solution for industrial, institutional and residential sectors. Plants designed and manufactured by us meet international standards. We also provide all necessary support in terms of design services, testing facilities, O&M contracts supply of spares and chemicals as well as training. Our design study actively engages the client to understand their requirements and problem areas.

We have helped many clients in meeting the statutory requirements of local Pollution Control Boards while also working on safe drinking water for human consumption on various projects namely paper, sugar, textiles, rice mills, water bottling plants housing societies, malls, schools, colleges, construction sites, etc.

We are committed to provide the best system designs, high quality equipment and matching post commissioning services to earn goodwill of our esteemed customers.

What is Reverse Osmosis?

Osmosis is a natural process known for more than 200 years on which Reverse Osmosis is based. Reverse Osmosis is a water purification process which utilizes a semipermeable membrane to remove dissolved minerals. If two solutions with different concentrations are separated by a semi-permeable membrane, then the water from the weaker solution flows towards the concentrated solution as if to try to equalize the concentrations. This is the natural OSMOTIC PHENOMENON. But if a sufficiently high pressure is applied to the concentrated solution, the pure water from it is forced through the permeable membrane, leaving behind the dissolved substances. This is called REVERSE OSMOSIS. Thus an R.O. unit can produce clear, fresh, pleasant tasting water from brackish or contaminated water from well, rivers or municipal supplies.

What is Alkaline Water?

Alkaline refers to part of the pH scale. This scale is from 0-14, the lower numbers are more acidic while the higher numbers are more alkaline with 7 being neutral. Most alkaline waters have a pH of 8 or 9 while pure water has a neutral pH of 7. The idea is that drinking alkaline water counteracts extra acidity in the body.

Does Alkaline Water alter the body's natural pH level?

Not really. Most of the time, your blood maintains a pH of 7; it falls right in the middle of the pH scale. What you eat and drink only alters the pH of your urine. So when you drink alkaline water, you'll change the pH of what's in your toilet bowl, not your blood. Plus, when the alkaline water you drink hits your stomach, the acids in your gut neutralize it. So essentially, you're paying a lot of money to drink something that won't affect your body's acidity.

What is Copper Water?

Copper filter for water purifiers that bring together goodness of Copper and many more health advantages. Active Copper instantly infuses copper ions into the water. It also releases not only Copper but optimum amount of other minerals like magnesium, Calcium and Zinc. Copper filter has properties that help kill harmful bacteria and reduce inflammation within the stomach, making it a great remedy for ulcers, indigestion and infections.

What is Mineral Water?

Mineral water comes from underground reservoirs. Unlike regular drinking water, mineral water does not undergo chemical processing. As the name suggests, mineral water contains high quantities of minerals, especially magnesium, calcium, and sodium.

VAM SOFT-PURE DIAMOND

- Multi purification by RO +UV+UF+TDS adjuster + Copper Inline + Mineral Cartridge. + Antiscalant + Pre- filter.
- 10 Stage filtration.
- Fully automatic operation with auto-start and auto-off.
- Smart control system.
- Taste controller to ensure pleasant flavor of water as preferred by the user.
- Push-fit components for leak – proof performance.
- Equally suitable for water from all sources such as bore-wells, overhead storage tanks, even municipal taps.
- Flow rate 12 – 15 ltrs./hr.
- Storage tank – 12ltrs/approx.
- Material food grade.

VAM SOFT-PURE REGULAR

- Multi purification by RO +UV+UF+TDS adjuster + Mineral Cartridge + Antiscalant + Pre- filter.
- 9 Stage filtration.
- Fully automatic operation with auto-start and auto-off.
- Smart control system.
- Taste controller to ensure pleasant flavor of water as preferred by the user.
- Push-fit components for leak – proof performance.
- Equally suitable for water from all sources such as bore-wells, overhead storage tanks, even municipal taps.
- Flow rate 12 – 15 ltrs./hr.
- Storage tank – 12ltrs/approx.
- Material food grade.

VAM SOFT-PURE SUPER⁺

- Multi purification by RO+UV +UF+TDS adjuster + Mineral Cartridge + Alkaline+ Anti scalant + Pre- filter.
- 10 Stage filtration.
- Fully automatic operation with auto-start and auto-off.
- Smart control system.
- Taste controller to ensure pleasant flavor of water as preferred by the user.
- Push-fit components for leak – proof performance.
- Equally suitable for water from all sources such as bore- wells, overhead storage tanks, even municipal taps.
- Flow rate 12 – 15 ltrs./hr.
- Storage tank – 14 ltrs/approx.
- Material food grade.

VAM SOFT-PURE SILVER

- Multi purification by RO+UV +UF+TDS adjuster + Mineral Cartridge + Antiscalant + Pre- filter.
- 9 Stage filtration.
- Metallic Look.
- Fully automatic operation with auto-start and auto-off.
- Smart control system.
- Taste controller to ensure pleasant flavor of water as preferred by the user.
- Push-fit components for leak – proof performance.
- Equally suitable for water from all sources such as bore-wells, overhead storage tanks, even municipal taps.
- Flow rate 12 – 15 ltrs./hr.
- Storage tank – 12 ltrs/approx.
- Material food grade.

VAM SOFT-PURE COPPER⁺

- Multi purification by RO +UV+UF+TDS adjuster + Alkaline + Mineral Cartridge + Antiscalant + Pre- filter + Copper Tank.
- 11 Stage filtration.
- Fully automatic operation with auto-start and auto-off.
- Smart control system.
- Taste controller to ensure pleasant flavor of water as preferred by the user.
- Push-fit components for leak – proof performance.
- Equally suitable for water from all sources such as bore-wells, overhead storage tanks, even municipal taps.
- Flow rate 12 – 15 ltrs./hr.
- Copper storage tank – 10ltrs/approx.
- Material food grade.

Copper Tank

VAM SOFT-PURE UTC

- Multi purification by RO +UV+UF+TDS adjuster + Mineral Cartridge
- This model is well suited for installation under the counter in a kitchen with the faucet mounted on the sink.
- Also suitable for use in offices.
- It is supplied with a hydro static 12 litres capacity plastic tank. The pressure from the R-O water maker fills purified R-O water into the hydro static tank and R-O water from the storage; tank is always kept under pressure and can be supplied at a higher level in the sink at any time.
- The installed unit can be concealed below the kitchen counter or behind water coolers. Easy to service.
- R-O water available on demand from the faucet in sink.
- 12 liter R-O water storage capacity in Hydro static plastic tank.
- Fully automatic operation of R-O water.

VAM SOFT-PURE 25 LTR/HRS RO

- Multi purification by RO.
- 5 Stage filtration.
- Manual operation.
- Smart control system.
- Taste controller to ensure pleasant flavour of water as preferred by the user.
- Push-fit components for leak – proof performance.
- Equally suitable for water from all sources such as bore-wells, overhead storage tanks, even municipal taps
- Flow rate 22 – 25 ltrs./hr.

VAM SOFT-PURE 50 LTR/HRS RO

- Multi purification by RO.
- 5 Stage filtration.
- Manual operation.
- Smart control system.
- Taste controller to ensure pleasant flavour of water as preferred by the user.
- Push-fit components for leak – proof performance.
- Equally suitable for water from all sources such as bore-wells, overhead storage tanks, even municipal taps
- Flow rate 45 – 50 ltrs./hr.

We also Deal in Commercial RO Plant & Softener Plant

ETP

Water Softener

Sand Filter & Softener Plant

RO System

Water Softener

Home Pressure Pump

250 LPH RO Plant

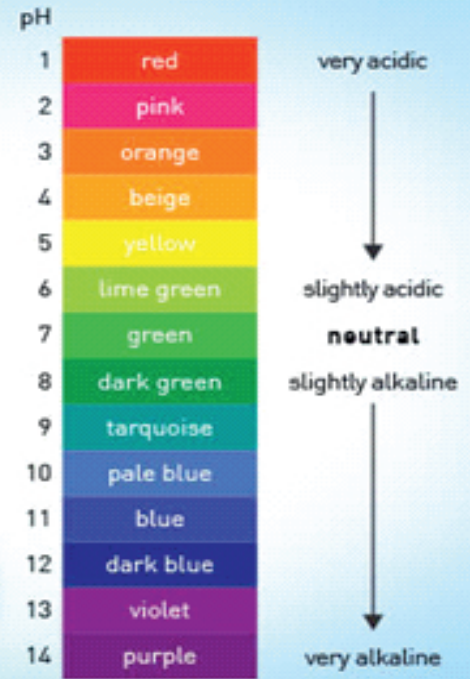

DM Plant

2000 LPH RO Plant

Why Should you drink VAM SOFT-PURE Alkaline Water Only ?

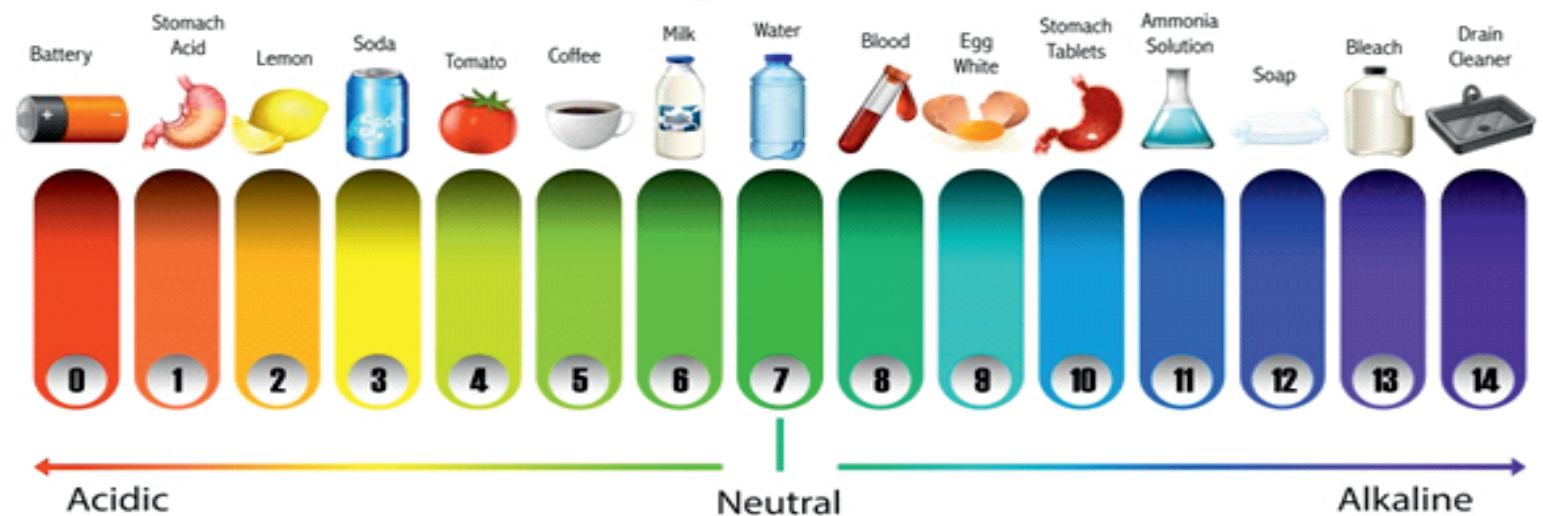

pH level in drinking water

If drinking alkaline water doesn't make a difference, how can we alter our body's pH?

The human body is a wonderful and complex machine. If there's an imbalance in your pH level, your body will correct it, no matter what you drink. For example, if your blood becomes too acidic, you will breathe out more carbon dioxide. The kidneys are also able to excrete excess acid in your urine.

The pH Scale
